

The DSC Conference gathers driving simulation specialists from the industrial and academic communities as well as commercial simulation providers. This 25th edition follows that of 2026, held in Antibes, in an only onsite version with 200+ participants on site and 30+ exhibitors. Both physical and remote participants came from all around the world from more than 20 different countries of Europe, America and Asia.

This year's edition will be held in Boulogne-Billancourt, in the Paris area, from September 15th to 17th, 2027. Topics will include state of the art in driving simulation technology, research and developments, extended with progressively merging XR and AI developments. This year program will also give an enlarged place for simulation tools for autonomous and connected vehicles along with advanced driving assistance system (ADAS) applications. Human factors and motion rendering nevertheless will remain the now traditional axis of the conference as well as XR based simulation technologies.

IMPORTANT DATES	
Call for Papers	1 Nov. 2026
